Web Developer

OBJECTIVE

Analysis of functional needs, development of web sites and web applications with the PHP programming language, maintenance of websites, ensuring project quality, development of specific modules, testing all the site and check bugs and deployment on the server.

SKILLS

More than 8 years of experience in website and web application development, as well as in website redesign and web mockup creation. I master the web development tools in native PHP, Laravel Framework and Codeigniter Framework, from the integration of the HTML5, CSS3 and JS portion from Figma or Adobe XD mockups, or the integration on the WordPress CMS. I am proficient in Photoshop, Illustrator, Adobe XD, Figma. I have a good knowledge on Github.

I also have the opportunity to code with React native and I created a mobile application for a start-up in France.
